

SAN LUIS VALLEY RURAL ELECTRIC COOPERATIVE, INC.
ELECTRIC RATE TARIFF
Meter Reading

Meter Reading

Each service meter shall clearly indicate the kilowatt hours and units of demand where applicable for the purpose of rendering a monthly billing statement to the consumer.

San Luis Valley Rural Electric uses automated meter infrastructure (AMI) technology to gather usage, voltage, readings and other valuable information from the meters. This system will communicate with meters through collectors (gatekeepers) installed throughout the system. The meter reading is sent back to the cooperative daily.

The meter reading date for all automated meters will be the first day of each month and bills are due the 15th of each month.

This tariff is subject to SLVREC's Electric Service Terms and Conditions. The Electric Service Terms and Conditions tariff is available upon request.
